

Eduardo Rojas Velasquez

IT Support Specialist & Full-Stack Developer

Location Santo Domingo, Dominican Republic	Email norascript@gmail.com
Website eduardo-cv.pages.dev	LinkedIn linkedin.com/in/eduardo-velasquez-437a3422a

Professional Summary

Versatile IT professional with hands-on experience in technical support, infrastructure administration, and full-stack development. Currently supporting a school environment with Fortinet firewalls, Active Directory, ManageEngine, and Mosyle MDM while also building production applications across Firebase, Supabase, Cloudflare, Docker, Flutter, React, Fastify, PostgreSQL, and Godot. Security-minded, automation-driven, and focused on shipping clean systems that solve real problems.

Core Strengths

• IT support, endpoint management, and network troubleshooting
• Fortinet firewall administration and secure access design
• Full-stack product delivery with React, Flutter, Fastify, and PostgreSQL
• Cloud deployment with Firebase, Supabase, Cloudflare, and Docker
• Automation with n8n, Python, and API integrations
• Security-focused implementation with RBAC, JWT, and CSP

Technical Skills

Languages	Dart, JavaScript, TypeScript, Python, SQL, GDScript, Java
Frontend	Flutter, React 18, Tailwind CSS, Vite, HTML5/CSS3, vanilla JS
Backend	Fastify, Node.js, Firebase, Supabase, REST APIs, WebSockets
DevOps & Cloud	Docker, Cloudflare Pages/Workers, GitHub Actions, CI/CD pipelines
Databases	PostgreSQL, Firestore, Supabase, SQLite
IT Support	Hardware troubleshooting, Google Workspace Admin, ManageEngine, Mosyle MDM
Security	Fortinet, VLAN, MSS clamping, VPN, JWT, bcrypt, CSP, RBAC
Tools	Git, VS Code, Postman, Figma, Adobe Suite, Jira, ServiceDesk

Professional Experience

Jul 2025 - Present | On-site | Santo Domingo, DR

- Deliver frontline support to 200+ faculty, staff, and students across hardware, software, and network issues.
- Manage Fortinet FortiGate firewalls, including VLAN segmentation, MSS clamping, VPN tunnels, firewall policies, and traffic shaping.
- Administer Active Directory, user and group management, GPO, organizational units, and account lifecycle.
- Maintain endpoint management via ManageEngine Endpoint Central and ServiceDesk, plus Mosyle MDM and Google Workspace Admin.
- Built Sharks Launchpad, a faculty CMS portal used daily by school staff, with Firebase and Cloudflare.

Full-Stack Developer & Software Architect

Self-Employed

2022 - Present | Remote

- FactuRD: full invoicing platform with Fastify, TypeScript, React, Tailwind, and PostgreSQL/Supabase-backed multi-tenant workflows.
- Digital Signage Platform: real-time screen pairing, Redis caching, JWT auth, MinIO S3, and Dockerized deployment.
- Mini Studio Web: multi-track audio workstation built with Flutter and Web Audio API, including waveform rendering and WAV export.
- NoraHR: production Kanban system with Gantt charts, SLA tracking, real-time chat, and GitHub Actions CI/CD.
- AI video pipeline: n8n-orchestrated automation using OpenAI and Gemini APIs.

React

Flutter

Fastify

PostgreSQL

n8n

Notable Outcomes

• FactuRD: my most complete application so far, built for tax-compliant invoicing and multi-tenant operations.
• Sharks Launchpad: daily-use faculty CMS portal for Carol Morgan School.
• Mini Studio Web: a polished cross-platform DAW that connects creative audio work with production engineering.
• EventPro Jinaite: events platform with RBAC, real-time data, and Cloudflare deployment.

Education

Systems Engineering

Universidad Autonoma de Santo Domingo (UASD) - Santo Domingo, DR

Expected 2028

Selected Projects

FactuRD	Tax-compliant invoicing platform with multi-tenant workflows, PDF generation, and secure auth.
---------	--

Sharks Launchpad	Faculty CMS portal built for Carol Morgan School using Firebase and Cloudflare.
Mini Studio Web	Cross-platform audio workstation with multi-track editing, waveform rendering, and WAV export.
Digital Signage	Real-time screen pairing, caching, Dockerized deployment, and JWT-secured access.
